

Note:

1. The report should be no more than 1000 words and 5 pages, with font size of at least 12, margin size of at least 1 inch and 1.5 line spacing.
2. Please do not submit .ipynb or .rmd files as the report.
3. The coursework will be marked based on the quality of the report, e.g. logic, structure, writing, correctness, presentation etc., and the quality of the codes, e.g. enough comments for readability. You will not be given a good mark if you achieve the highest accuracy, but do not write a good report and high-quality codes.
4. You may not be able to include all classifiers that you have tried in the report, given the word and page limits. Thus, please give clear motivation and explanations of why the classifiers in the report are chosen.
